

Super Bug Zapper User Guide

By Keira Shepherd

Intro

Super Bug Zapper is a HTML5 browser game. It simple and fun for all ages! The goal of the game is to remove all the bacteria from the petri dish before they grow too big.

The Game

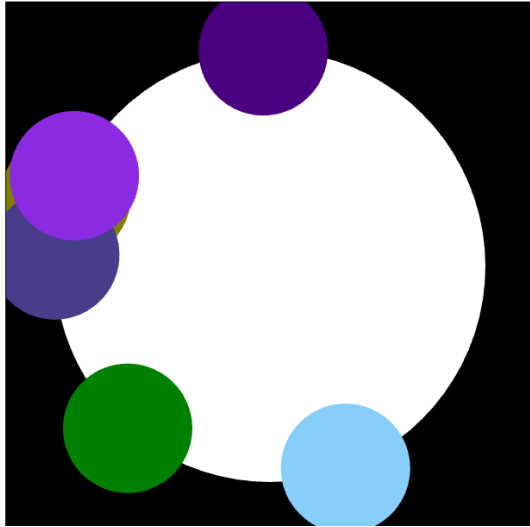

Above we have a screen shot of the game. In this game the petri dish is the large white circle. While the smaller colorful circles are the bacteria.

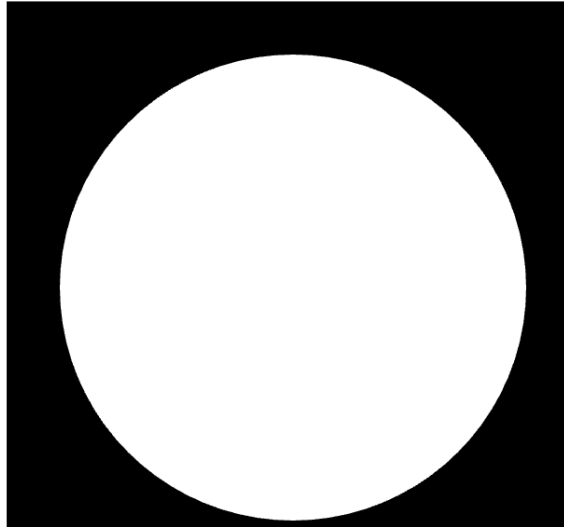

To remove bacteria from the dish, simply move your mouse over the bacteria and click. Simple as that.

Winning and Losing

You Lost!

You Win!

Pictured above are a sample of a winning and losing game.

Above your game field you will see a text that will say “Playing” while the game is in progress, and “You Lost!” after you have lost the game, and “You Win!” when you win the game.

Playing Again

After your game as finished you can restart by simply pressing the refresh button on your browser.

Notes from the Developer

My location detection isn't very good, so it messes up some of my features, sorry.
